

NUTIZA

Protein Powder

PROTEIN FOR GOOD HEALTH

- ❖ Protein is crucial to good health.
- ❖ In fact, the name comes from the Greek word proteos, meaning “primary” or “first place.”
- ❖ Proteins are made up of amino acids that join together to form long chains. You can think of a protein as a string of beads in which each bead is an amino acid.
- ❖ There are 20 amino acids that help form the thousands of different proteins in your body.
- ❖ Proteins do most of their work in the cell and perform various jobs.

MAJOR FUNCTION OF PROTEIN IN BODY

- ❖ Enzymes are proteins that allow key chemical reactions to take place within your body.
- ❖ A class of proteins known as fibrous proteins provide various parts of your body with structure, strength and elasticity.
- ❖ Proteins act as a buffer system, helping your body maintain proper pH values of the blood and other bodily fluids.
- ❖ Proteins in your blood maintain the fluid balance between your blood and the surrounding tissues. Proteins form antibodies to protect your body from foreign invaders, such as disease-causing bacteria and viruses.
- ❖ Protein is required for the growth and maintenance of tissues. Your body's protein needs are dependent upon your health and activity level.
